About The <Social> Hackathon.

The Social Hackathon brings together tech innovators, developers, and changemakers to **create** technology-driven solutions **for** pressing **social challenges**.

Founded in **2019**, our hackathon has grown into a dynamic space for social innovation, bringing together **tech enthusiasts** and problem-solvers. We focus on real-world challenges and creating practical solutions to support communities.

The **2026 edition** will run for **24 hours** of intense collaboration, mentorship, and innovation from **May 13th-14th**, bringing together diverse perspectives and expertise.

- Head over to our [**official website**](#) for more info.

2025 Hackathon Highlights.

- Participants: **90** teams shortlisted nationwide for the on-campus hackathon.
- Winning Innovations:
 - **1st Prize**: Miniaturized electro-osmotic pump for non-invasive cancer drug delivery by Team Tools Squad (CMRIT).
 - **2nd Prize**: WildlifeRailGuard, an AI-driven system preventing train-animal collisions by Team GARUDA (Amrita Vishwa Vidyapeetham).

Media Highlights

Turning ideas into impact! CMRIT's National Social Hackathon grabbed the spotlight, making waves across media platforms with groundbreaking innovations and real-world solutions.

Hackathon Themes.

Part 1

Theme 1: Student Innovation using IndiaStack

IndiaStack is revolutionizing finance, governance, and healthcare through digital public infrastructure. Students can harness its technologies—Aadhaar, UPI, DigiLocker, e-Sign, and more—to drive meaningful change.

Relevant SDGs: SDG 8, 9,10,16

 [Read more](#)

Theme 2: Urban Planning

As urban populations grow, cities must become more efficient, sustainable, and tech-driven. This theme explores innovative solutions to enhance infrastructure, mobility, and livability.

Relevant SDGs: SDG 9,11,13

 [Read more](#)

Hackathon Themes.

Part 2

Theme 3: Education

Education must be accessible, interactive, and inclusive. Technology can empower students, teachers, and institutions to enhance learning experiences.

Relevant SDGs: SDG 4,9,10

 [Read more](#)

Theme 4: Energy efficiency in AI/Computing

Optimize AI models and computing systems to reduce energy consumption, improve sustainability, and lower carbon footprints.

Relevant SDGs: SDG 7,9,13

 [Read more](#)

Hackathon Themes.

Part 3

Theme 5: Agriculture

Technology can revolutionize farming, food production, and sustainability, making agriculture more efficient and resilient to climate change.

Relevant SDGs: SDG 2,9,12,13

 [Read more](#)

Theme 6: Health and Inclusivity

Create solutions that improve healthcare accessibility, particularly for underserved communities, through telemedicine, AI diagnostics, and digital health records.

Relevant SDGs: SDG 3,9,10

 [Read more](#)

Hackathon Themes.

Part 4

Theme 7: Animal Welfare

Technology can improve animal welfare, rescue efforts, and conservation, ensuring better care and protection.

Relevant SDGs: SDG 3,4,9,11

 [Read more](#)

Theme 8: FinTech & Financial Inclusion

Create solutions for microfinances, digital lending, fraud detection, and financial literacy for mobile banking and instant transactions, especially in rural and underserved areas.

Relevant SDGs: SDG 1,8,9,10

 [Read more](#)

Hackathon Themes.

Part 5

Theme 9: AI for Impact

Develop AI solutions for disease prediction, smart learning systems, crop analysis, and public safety under initiatives like Smart Cities Mission.

Relevant SDGs: SDG 12,14,15

 [Read more](#)

Theme 10: Climate Tech & Sustainability

Build projects related to solar energy, EV infrastructure, pollution monitoring and climate analytics aligned with programs like National Solar Mission.

Relevant SDGs: SDG 7, 11, 12, 13

Event Phases.

Round **1**: Online round

Description:

- **Total of 90 teams** will be **shortlisted** based on the project descriptions submitted. Out of these, **55 teams** will be selected for the Software and **35 teams** will be selected* for the Hardware category.
- The selected teams will advance to the offline round.

Important Dates:

- Last Date for Registration Submission: **25th April 2026**
- Results Announcement: **5th May 2026**

Event Phases.

Round 2 : Offline round

Description:

- The event will be conducted on 13th and 14th May 2026
- Only teams selected from round 1 will be allowed.
- 3 reviews of the projects will take place throughout the 24 hours.
- Hardware and Software projects will be judged separately.

Rules and Regulations.

- **Eligibility:** Open to college students in India; register before the deadline.
- **Team Size:** 2-4 members per team.
- **Original Work:** Projects must be developed during the hackathon and match the theme.
- **Code Usage:** Pre-existing code allowed with proper credit.
- **Submission and Judging:** Submit on time with all required materials. Judging will be based on innovation, feasibility, execution, and presentation.
- **Conduct:** Fair play is a must; misconduct leads to disqualification.
- **Ownership:** Teams own their projects but allow promotional use.
- **Mentorship:** Access mentors, workshops, and resources for help.
